

Take your class on a road test!

Meticulously designed as the premier air brake system training aid in the world. This product is comprised of a complete transit bus air brake system with all DOT approved components; disc brake systems, and all valving currently in use today. No legacy components here. This is the real deal.

Included Support Materials

- Complete **operation manual**
- Pneumatic schematics
- Faulted pneumatic schematics
- Wiring schematics
- Faulted wiring schematics
- **10 student assignments**
- Instructor guide with answer keys
- All documents available in PDF format for download from www.consulab.com
- **Available on-site teacher training**

Imagine **driving** down the road with your class of students demonstrating **ABS**, and **ATC** function on a complete **Transit Bus** air brake system with all students seeing the scan data and wheel speeds!

- Teach basic air brake inspections
- **Liberate** yourself from lengthy setup times and exercise development
- Be setup to teach in **5 minutes**
- Challenge your students with basic, intermediate and advanced exercises
- **20+ pneumatic and electrical faults**

Features

- [™]Bendix Premium ABS-ATC
- FMVSS 121 compliant
- Demonstrates ABS braking events
- Individual tone wheels and electric motors driving each wheel
- Real accelerator and brake pedals
- Live J1939 CANBus network
- Datalink connector for scan tool
- Dynamic driving simulation up to 55 mph
- Individual wheel speed displays
- Fits through a standard doorway

Main Components

- [™]Bendix EC-60 ECU
- Disc air brake chambers
- [™]Bendix AD-IS dryer w/ purge tank
