

TRX-200 Transformer Training System

The TRX- Transformer Training System is a self-contained tabletop or mobile unit that allows for hands-on exercises in the connection of various transformer configuration. The system includes banana jack connections that allow students to quickly connect and modify circuits for operational verification. The system is available as a stand-alone unit, or it can be added to the IW-201 system for expanded functionality.

System Includes:

- 3-Phase 208/120Vac Power Entry
- Locking Fused Disconnect
- (3) Single Phase Transformers
- (1) Buck/Boost Transformer
- (4) Transformer Connection Modules
- 4mm Safety Banana Jack Connections
